Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Regulation (EU) No. 2015/830. - United Kingdom (UK)

## SAFETY DATA SHEET

Intergard 251 Red Part A

## SECTION 1: Identification of the substance/mixture and of the company/ undertaking

#### 1.1 Product identifier

: Intergard 251 Red Part A

Product name Product code

: KGA902

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

| Identified uses                               |        |  |  |
|---|--------|--|--|
| Professional application of coatings and inks |        |  |  |
| Uses advised against                          | Reason |  |  |
| All Other Uses                                |        |  |  |

#### 1.3 Details of the supplier of the safety data sheet

International Farg AB Holmedalen 3 Aspereds Industriomrade SE-424 22 Angered Sweden

Tel: +46 (0) 31 928500 Fax: +46 (0) 31 928530

e-mail address of person : sdsfellinguk@akzonobel.com responsible for this SDS National contact

#### 1.4 Emergency telephone number

National advisory body/Poison Centre (For use only by licensed medical professionals.)Telephone number: +44 (0)844 892 0111SupplierTelephone number: +46 8 33 12 31

### **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

Product definition : Mixture

#### Classification according to Regulation (EC) No. 1272/2008 [CLP/GHS]

Flam. Liq. 3, H226 Skin Irrit. 2, H315 Eye Irrit. 2, H319 Skin Sens. 1, H317 Aquatic Chronic 2, H411 The product is classified as hazardous according to Regulation (EC) 1272/2008 as amended.

See Section 16 for the full text of the H statements declared above.

See Section 11 for more detailed information on health effects and symptoms.

#### 2.2 Label elements

## AkzoNobel

## **SECTION 2: Hazards identification**

| Hazard pictograms   |   |
|---|---|
| Signal word   | : Warning   |
| Hazard statements   | <ul> <li>Flammable liquid and vapour.</li> <li>Causes serious eye irritation.</li> <li>Causes skin irritation.</li> <li>May cause an allergic skin reaction.</li> <li>Toxic to aquatic life with long lasting effects.</li> </ul> |
| Precautionary statements  |   |
| Prevention  | : Wear protective gloves. Wear eye or face protection. Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. Avoid release to the environment.   |
| Response  | : IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. IF ON SKIN: Take off contaminated clothing and wash it before reuse.   |
| Storage   | : Keep cool.  |
| Disposal  | : Dispose of contents and container in accordance with all local, regional, national and international regulations.   |
| Hazardous ingredients   | : Phenol, 4,4'-(1-methylethylidene)bis-, polymer with 2,2'-[(1-methylethylidene)bis(4, 1-phenyleneoxymethylene)]bis[oxirane]  |
| Supplemental label<br>elements  | :   |
|   | Wear appropriate respirator when ventilation is inadequate.   |
| Annex XVII - Restrictions<br>on the manufacture,<br>placing on the market and<br>use of certain dangerous<br>substances, mixtures and<br>articles | : Not applicable.   |

| 2.3 Other hazards            |   |             |
|------------------------------|---|-------------|
| Other hazards which do       | : | None known. |
| not result in classification |   |             |

## **SECTION 3: Composition/information on ingredients**

|  |  |      | See Section 16 for the<br>full text of the H<br>statements declared<br>above.  |   |         |

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment, are PBTs or vPvBs or have been assigned a workplace exposure limit and hence require reporting in this section.

Туре

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

|--|---|-------------|
| <b>SECTION 4: First</b> a                    | aid measures  |             |
| 4.1 Description of first aid                 | d measures  |             |
| General                                      | <ul> <li>In all cases of doubt, or when symptoms persist, seek n<br/>anything by mouth to an unconscious person. If uncons<br/>position and seek medical advice.</li> </ul> |             |
| Eye contact                                  | : Remove contact lenses, irrigate copiously with clean, free eyelids apart for at least 10 minutes and seek immediat  |             |
| Inhalation                                   | <ul> <li>Remove to fresh air. Keep person warm and at rest. If r<br/>irregular or if respiratory arrest occurs, provide artificial<br/>trained personnel.</li> </ul>        |             |
| Skin contact                                 | : Remove contaminated clothing and shoes. Wash skin t<br>water or use recognised skin cleanser. Do NOT use sol  |             |
| Ingestion                                    | : If swallowed, seek medical advice immediately and sho<br>Keep person warm and at rest. Do NOT induce vomiting   |             |
| Date of issue/Date of revision<br>Version :3 | : 31/05/2017<br>3/15  | AkzoNobel   |

| <b>SECTION 4: First ai</b>  | d measures  |
|-----------------------------|---|
| Protection of first-aiders  | : No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves. |
| 4.2 Most important sympto   | oms and effects, both acute and delayed   |
| Potential acute health effe | <u>ects</u>   |
| Eye contact                 | : Causes serious eye irritation.  |
| Inhalation                  | : No known significant effects or critical hazards.   |
| Skin contact                | : Causes skin irritation. May cause an allergic skin reaction.  |
| Ingestion                   | : Irritating to mouth, throat and stomach.  |
| Over-exposure signs/sym     | iptoms  |
| Eye contact                 | : Adverse symptoms may include the following:<br>pain or irritation<br>watering<br>redness  |
| Inhalation                  | : Adverse symptoms may include the following:<br>headache<br>drowsiness/fatigue<br>dizziness/vertigo<br>muscle weakness<br>unconsciousness  |
| Skin contact                | : Adverse symptoms may include the following:<br>irritation<br>redness  |
| Ingestion                   | : No specific data.   |
| 4.3 Indication of any immed | diate medical attention and special treatment needed  |
| Notes to physician          | <ul> <li>Treat symptomatically. Contact poison treatment specialist immediately if large<br/>quantities have been ingested or inhaled.</li> </ul>   |
| Specific treatments         | : No specific treatment.  |

X.International.

**SECTION 5: Firefighting measures** 

| 5.1 Extinguishing media                       |  |    |
|---|--|----|
| Suitable extinguishing media                  | : Use dry chemical, CO <sub>2</sub> , water spray (fog) or foam.   |    |
| Unsuitable extinguishing media                | Do not use water jet.  |    |
| 5.2 Special hazards arising f                 | rom the substance or mixture   |    |
| Hazards from the substance or mixture         | : Flammable liquid and vapour. In a fire or if heated, a pressure increase will occur<br>and the container may burst, with the risk of a subsequent explosion. Runoff to<br>sewer may create fire or explosion hazard. This material is toxic to aquatic life with<br>long lasting effects. Fire water contaminated with this material must be contained<br>and prevented from being discharged to any waterway, sewer or drain. | ı  |
| Hazardous thermal decomposition products      | : Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>phosphorus oxides<br>metal oxide/oxides  |    |
| 5.3 Advice for firefighters                   |  |    |
| Special protective actions for fire-fighters  | : Promptly isolate the scene by removing all persons from the vicinity of the incident there is a fire. No action shall be taken involving any personal risk or without suitable training. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool.  | if |
| Date of issue/Date of revision<br>Version : 3 | : 31/05/2017 AkzoNobel   | I  |

#### **SECTION 5: Firefighting measures**

| •   |   |
|---|---|
| Special protective<br>equipment for fire-fighters | : Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents. |
| CECTION C. Assidan                                |   |

**X**International

#### **SECTION 6: Accidental release measures**

| 6.1 Personal precautions, pro   | te | ctive equipment and emergency procedures   |
|---------------------------------|----|--|
| For non-emergency<br>personnel  | :  | No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Shut off all ignition sources.<br>No flares, smoking or flames in hazard area. Avoid breathing vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment.   |
| For emergency responders        | :  | If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".  |
| 6.2 Environmental precautions   | :  | Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains<br>and sewers. Inform the relevant authorities if the product has caused environmental<br>pollution (sewers, waterways, soil or air). Water polluting material. May be harmful<br>to the environment if released in large quantities. Collect spillage.  |
| 6.3 Methods and material for    | со | ntainment and cleaning up  |
| Small spill                     | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
| Large spill                     | :  | Stop leak if without risk. Move containers from spill area. Use spark-proof tools and explosion-proof equipment. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. |
| 6.4 Reference to other sections | :  | See Section 1 for emergency contact information.<br>See Section 8 for information on appropriate personal protective equipment.<br>See Section 13 for additional waste treatment information.  |

### **SECTION 7: Handling and storage**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 7.1 Precautions for safe handling

Protective measures
 Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Do not get in eyes or on skin or clothing. Do not ingest. Avoid breathing vapour or mist. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Take precautionary measures against electrostatic discharges. Empty containers retain product residue and can be hazardous. Do not reuse container.

5/15

2

## **SECTION 7: Handling and storage**

| Advice on general occupational hygiene | : Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
|--|---|

#### 7.2 Conditions for safe storage, including any incompatibilities

Store in accordance with local regulations. Store in a segregated and approved area. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Eliminate all ignition sources. Vapours are heavier than air and may spread along floors. Separate from oxidizing materials. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

| 7.3 Specific end use(s)                 |                  |
|---|------------------|
| Recommendations                         | : Not available. |
| Industrial sector specific<br>solutions | : Not available. |

## **SECTION 8: Exposure controls/personal protection**

The information in this section contains generic advice and guidance. Information is provided based on typical anticipated uses of the product. Additional measures might be required for bulk handling or other uses that could significantly increase worker exposure or environmental releases.

#### 8.1 Control parameters

#### **Occupational exposure limits**

| Product/ingredient                 | name  | Exposure limit values   |
|------------------------------------|---|---|
| xylene                             |   | EH40/2005 WELs (United Kingdom (UK), 12/2011). Absorbed<br>through skin.<br>STEL: 441 mg/m <sup>3</sup> 15 minutes.<br>STEL: 100 ppm 15 minutes.<br>TWA: 220 mg/m <sup>3</sup> 8 hours.<br>TWA: 50 ppm 8 hours.   |
| 1-methoxy-2-propanol               |   | EH40/2005 WELs (United Kingdom (UK), 12/2011). Absorbed<br>through skin.<br>STEL: 560 mg/m <sup>3</sup> 15 minutes.<br>STEL: 150 ppm 15 minutes.<br>TWA: 375 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours.  |
| ethylbenzene                       |   | EH40/2005 WELs (United Kingdom (UK), 12/2011). Absorbed<br>through skin.<br>STEL: 552 mg/m <sup>3</sup> 15 minutes.<br>STEL: 125 ppm 15 minutes.<br>TWA: 441 mg/m <sup>3</sup> 8 hours.<br>TWA: 100 ppm 8 hours.  |

| ate of issue/Date of revision      | : 31/05/2017  | AkzoNobel   |

## **SECTION 8: Exposure controls/personal protection**

required.

#### DNELs/DMELs

No DNELs/DMELs available.

#### **PNECs**

No PNECs available

| 8.2 Exposure controls            |  |
|----------------------------------|--|
| Appropriate engineering controls | : Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.   |
| Individual protection meas       | ures   |
| Hygiene measures                 | : Wash hands, forearms and face thoroughly after handling chemical products,<br>before eating, smoking and using the lavatory and at the end of the working period.<br>Appropriate techniques should be used to remove potentially contaminated clothing.<br>Contaminated work clothing should not be allowed out of the workplace. Wash<br>contaminated clothing before reusing. Ensure that eyewash stations and safety<br>showers are close to the workstation location.  |
| Eye/face protection              | : Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.   |
| Skin protection                  |  |
| Hand protection                  | : Use chemical resistant gloves classified under Standard EN 374: Protective gloves against chemicals and micro-organisms. Recommended: Viton® or Nitrile gloves. When prolonged or frequently repeated contact may occur, a glove with a protection class of 6 (breakthrough time greater than 480 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 2 or higher (breakthrough time greater than 30 minutes according to EN 374) is recommended. The user must check that the final choice of type of glove selected for handling this product is the most appropriate and takes into account the particular conditions of use, as included in the user's risk assessment. NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/ specifications provided by the glove supplier. Barrier creams may help to protect the exposed areas of the skin but should not be applied once exposure has occurred. |
| Body protection                  | : Personal protective equipment for the body should be selected based on the task<br>being performed and the risks involved and should be approved by a specialist<br>before handling this product. When there is a risk of ignition from static electricity,<br>wear anti-static protective clothing. For the greatest protection from static<br>discharges, clothing should include anti-static overalls, boots and gloves. Refer to<br>European Standard EN 1149 for further information on material and design<br>requirements and test methods.   |
| Other skin protection            | <ul> <li>Appropriate footwear and any additional skin protection measures should be<br/>selected based on the task being performed and the risks involved and should be<br/>approved by a specialist before handling this product.</li> </ul>  |
| Respiratory protection           | : Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.  |

7/15

:

## **SECTION 8: Exposure controls/personal protection**

| Environmental exposure |  |
|------------------------|--|
| controls               |  |

: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

**X**International.

## **SECTION 9: Physical and chemical properties**

| 9.1 Information on basic physical               | and chemical properties   |
|---|---|
| <u>Appearance</u>                               |   |
| Physical state                                  | : Liquid.   |
| Colour  | : Red.  |
| Odour   | : Solvent.  |
| Odour threshold                                 | : Not available.  |
| рН  | : Not applicable.   |
| Melting point/freezing point                    | : Not available.  |
| Initial boiling point and<br>boiling range      | : Lowest known value: 136.16°C (277.1°F) (xylene).                        |
| Flash point                                     | : Closed cup: 24°C  |
| Evaporation rate                                | : Not available.  |
| Flammability (solid, gas)                       | : Not available.  |
| Upper/lower flammability or<br>explosive limits | : Greatest known range: Lower: 1.48% Upper: 13.74% (1-methoxy-2-propanol) |

## **SECTION 13: Disposal considerations**

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

#### 13.1 Waste treatment methods

| <u>Product</u>      |   |
|---------------------|---|
| Methods of disposal | <ul> <li>The generation of waste should be avoided or minimised wherever possible.<br/>Disposal of this product, solutions and any by-products should at all times comply<br/>with the requirements of environmental protection and waste disposal legislation<br/>and any regional local authority requirements.<br/>Dispose of surplus and non-recyclable products via a licensed waste disposal<br/>contractor. Waste should not be disposed of untreated to the sewer unless fully<br/>compliant with the requirements of all authorities with jurisdiction.</li> </ul> |
| Hazardous waste     | : The classification of the product may meet the criteria for a hazardous waste.  |

#### European waste catalogue (EWC)

|                     | 1   |  |  |  |
|---------------------|---|--|--|--|
| Code number         | Waste designation   |  |  |  |
| EWC 08 01 11*       | waste paint and varnish containing organic solvents or other hazardous substances   |  |  |  |
| Packaging           |   |  |  |  |
| Methods of disposal | <ul> <li>Dispose of containers contaminated by the product in accordance with local or<br/>national legal provisions. This material and its container must be disposed of as<br/>hazardous waste. Dispose of via a licensed waste disposal contractor.</li> </ul>   |  |  |  |
| Special precautions | : This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Vapour from product residues may create a highly flammable or explosive atmosphere inside the container. Do not cut, weld or grind used containers unless they have been cleaned thoroughly internally. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. |  |  |  |

## **SECTION 14: Transport information**

|                                    | ADR/RID  | IMDG  | ΙΑΤΑ   |
