

Interline 984

Versatile epoxy phenolic storage tanklining

Interline 984 is an ideal lining for the refining and petrochemical industry, offering reduced complexity by covering most your crude and refined product needs with one product.

Product features

- Thick film, solvent-free, low VOC epoxy phenolic tank lining
- Resistant to crude oil up to 90°C (194°F), including sour crude
- High build capability - ideal for maintenance of pitted substrates
- Suitable for use as a single coat lining system or in conjunction with (Matcote®) glass fibre laminate system
- Complies with immersion testing requirements of EI 1541 for aviation fuel storage
- Recoatable up to 28 days for improved scheduling of contracts
- Resistance to bio-fuels

Ease of application

Interline 984 has been formulated with ease of application at the forefront. The product can be sprayed cold through a single leg, airless pump, and repairs can be made by brush up to 28 days later.

Reinforced systems

Interline 984 can be applied as a Matcote or hand-lay laminate system, where tank floor rehabilitation requires a lining system conforming to API 652/653 reinforced systems allowing extension of inspection intervals.
