In accordance with the Standard for Classification and Labelling of Chemical Substance and Material Safety Data Sheet, Article 10 Paragraph

## **SAFETY DATA SHEET**

### **Enviroline 405HT Part B**

### Section 1. Chemical product and company identification

#### A. Product name

: Enviroline 405HT Part B

**Product code** : NVA405

#### B. Relevant identified uses of the substance or mixture and uses advised against

| Identified uses                               |        |  |
|---|--------|--|
| Professional application of coatings and inks |        |  |
| Uses advised against                          | Reason |  |
| All Other Uses                                |        |  |

| C. Manufacturer  | : International Farg AB<br>Holmedalen 3<br>Aspereds Industriomrade<br>SE-424 22 Angered<br>Sweden |
|--|---|
|  | Tel: +46 (0) 31 928500 Fax: +46 (0) 31 928530   |
| Emergency telephone<br>number (with hours of<br>operation) | : +46 8 33 12 31  |
| e-mail address of person<br>responsible for this SDS       | : sdsfellinguk@akzonobel.com  |

### Section 2. Hazards identification

| Α. | Hazard classification | : ACUTE TOXICITY (oral) - Category 4<br>SKIN CORROSION/IRRITATION - Category 1<br>SERIOUS EYE DAMAGE/ EYE IRRITATION - Category 1 |
|----|-----------------------|---|
|    |                       | SKIN SENSITIZATION - Category 1   |
|    |                       | CARCINOGENICITY - Category 1A   |
|    |                       | TOXIC TO REPRODUCTION (Fertility) - Category 1B   |
|    |                       | SPECIFIC TARGET ORGAN TOXICITY (REPEATED EXPOSURE) - Category 2   |
|    |                       | ACUTE AQUATIC HAZARD - Category 1   |
|    |                       | LONG-TERM AQUATIC HAZARD - Category 1   |

#### B. GHS label elements, including precautionary statements :

Symbol

1

| Signal word       | : Danger   |
|-------------------|--|
| Hazard statements | <ul> <li>Harmful if swallowed.</li> <li>Causes severe skin burns and eye damage.</li> <li>May cause an allergic skin reaction.</li> <li>May cause cancer.</li> <li>May damage fertility.</li> <li>May cause damage to organs through prolonged or repeated exposure.</li> <li>Very toxic to aquatic life with long lasting effects.</li> </ul> |

### Section 2. Hazards identification

| Precautionary statements    | 2 |  |
|-----------------------------|---|--|
| Prevention                  | : | Obtain special instructions before use. Do not handle until all safety precautions<br>have been read and understood. Use personal protective equipment as required.<br>Wear protective gloves. Wear eye or face protection. Wear protective clothing.<br>Avoid release to the environment. Do not breathe vapour. Do not eat, drink or<br>smoke when using this product. Wash hands thoroughly after handling.<br>Contaminated work clothing should not be allowed out of the workplace.   |
| Response                    | : | Collect spillage. Get medical attention if you feel unwell. IF exposed or concerned:<br>Get medical attention. IF INHALED: Remove victim to fresh air and keep at rest in<br>a position comfortable for breathing. Immediately call a POISON CENTER or<br>physician. IF SWALLOWED: Immediately call a POISON CENTER or physician.<br>Rinse mouth. Do NOT induce vomiting. IF ON SKIN (or hair): Take off<br>immediately all contaminated clothing. Rinse skin with water or shower. Wash<br>contaminated clothing before reuse. Immediately call a POISON CENTER or<br>physician. IF ON SKIN: Wash with plenty of soap and water. If skin irritation or<br>rash occurs: Get medical attention. IF IN EYES: Rinse cautiously with water for<br>several minutes. Remove contact lenses, if present and easy to do. Continue<br>rinsing. Immediately call a POISON CENTER or physician. |
| Storage                     | : | Store locked up.   |
| Disposal                    | : | Dispose of contents and container in accordance with all local, regional, national and international regulations.  |
| Supplemental label elements | : | Wear appropriate respirator when ventilation is inadequate.  |
| C. Other hazards which do   | : | None known.  |

### Section 3. Composition/information on ingredients

Substance/mixture

not result in classification

: Mixture

| Ingredient name   | Common name  | CAS number  | %         | Classification  |
|---|--|-------------|-----------|---|
| crystalline silica, respirable<br>powder                | silica, crystalline - quartz                               | 14808-60-7  | ≥40 - <50 | Carc. 1A, H350  |
| Formaldehyde, polymer with<br>benzenamine, hydrogenated | Formaldehyde, polymer<br>with benzenamine,<br>hydrogenated | 135108-88-2 | ≥10 - <20 | Acute Tox. 4, H302<br>Skin Corr. 1, H314<br>Eye Dam. 1, H318<br>Skin Sens. 1, H317<br>STOT RE 2, H373<br>(oral)<br>Aquatic Chronic 3,<br>H412 |
| 4,4'-methylenebis<br>(cyclohexylamine)                  | Methylenedi<br>(cyclohexylamine)                           | 1761-71-3   | ≥10 - <20 | Acute Tox. 4, H302<br>Skin Corr. 1, H314<br>Eye Dam. 1, H318<br>Skin Sens. 1, H317<br>STOT RE 2, H373<br>(oral)<br>Aquatic Chronic 2,<br>H411 |

Version 4 :

### Section 3. Composition/information on ingredients

| Mica-group minerals                      | Mica  | 12001-26-2 | <10       | Not classified.   |
|--|---|------------|-----------|---|
| crystalline silica, respirable<br>powder | Respirable content of<br>crystalline silica in whole<br>product | 14808-60-7 | <10       | Carc. 1A, H350  |
|  | F   |            |           | STOT RE 1, H372   |
| titanium dioxide                         | Titanium dioxide  | 13463-67-7 | ≥0.1 - <5 | Carc. 2, H351   |
| 4-nonylphenol, branched                  | phenol, 4-nonyl-,<br>branched                                   | 84852-15-3 | ≥0.3 - <5 | Acute Tox. 4, H302<br>Skin Corr. 1, H314<br>Eye Dam. 1, H318<br>Repr. 2, H361fd<br>(Fertility and Unborn<br>child)<br>Aquatic Acute 1, H400<br>Aquatic Chronic 1,<br>H410             |
| xylene                                   | xylene  | 1330-20-7  | ≥1 - <5   | Flam. Liq. 3, H226<br>Acute Tox. 4, H312<br>Acute Tox. 4, H332<br>Skin Irrit. 2, H315<br>Eye Irrit. 2, H319<br>STOT SE 3, H336<br>STOT RE 1, H372                                     |
| 2,2'-iminodiethylamine                   | diethylenetriamine  | 111-40-0   | ≥1 - <5   | Acute Tox. 4, H302<br>Acute Tox. 4, H312<br>Acute Tox. 2, H330<br>Skin Corr. 1, H314<br>Eye Dam. 1, H318<br>Skin Sens. 1, H317<br>STOT SE 3, H335                                     |
| bisphenol A                              | 4,4'-<br>isopropylidenediphenol                                 | 80-05-7    | <10       | Eye Dam. 1, H318<br>Skin Sens. 1, H317<br>Repr. 1B, H360<br>(Fertility)<br>STOT SE 3, H335  |
| ethylbenzene                             | ethylbenzene  | 100-41-4   | ≥0.1 - <5 | Flam. Liq. 2, H225<br>Acute Tox. 4, H332<br>Skin Irrit. 2, H315<br>Eye Irrit. 2, H319<br>Carc. 2, H351<br>STOT SE 3, H335<br>STOT RE 2, H373<br>(hearing organs)<br>Asp. Tox. 1, H304 |

There are no ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

| Α. | Eye contact                | : | Get medical attention immediately. Call a poison center or physician. Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly by a physician.   |
|----|----------------------------|---|--|
| В. | Skin contact               | : | Get medical attention immediately. Call a poison center or physician. Wash with<br>plenty of soap and water. Remove contaminated clothing and shoes. Wash<br>contaminated clothing thoroughly with water before removing it, or wear gloves.<br>Continue to rinse for at least 10 minutes. Chemical burns must be treated promptly<br>by a physician. In the event of any complaints or symptoms, avoid further exposure.<br>Wash clothing before reuse. Clean shoes thoroughly before reuse.  |
| C. | Inhalation                 | : | Get medical attention immediately. Call a poison center or physician. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of inhalation of decomposition products in a fire, symptoms may be delayed. The exposed person may need to be kept under medical surveillance for 48 hours.      |
| D. | Ingestion                  | : | Get medical attention immediately. Call a poison center or physician. Wash out<br>mouth with water. Remove dentures if any. Remove victim to fresh air and keep at<br>rest in a position comfortable for breathing. If material has been swallowed and the<br>exposed person is conscious, give small quantities of water to drink. Stop if the<br>exposed person feels sick as vomiting may be dangerous. Do not induce vomiting<br>unless directed to do so by medical personnel. If vomiting occurs, the head should<br>be kept low so that vomit does not enter the lungs. Chemical burns must be treated<br>promptly by a physician. Never give anything by mouth to an unconscious person.<br>If unconscious, place in recovery position and get medical attention immediately.<br>Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or<br>waistband. |
| E. | Notes to physician         | : | In case of inhalation of decomposition products in a fire, symptoms may be delayed.<br>The exposed person may need to be kept under medical surveillance for 48 hours.   |
|    | Specific treatments        | : | No specific treatment.   |
|    | Protection of first-aiders | : | No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Wash contaminated clothing thoroughly with water before removing it, or wear gloves.  |

See toxicological information (Section 11)

### Section 5. Firefighting measures

| Α. | Extinguishing media               |   |  |
|----|-----------------------------------|---|--|
|    | Suitable extinguishing media      | : Use an extinguishing agent suitable for the surrounding fire. |  |
|    | Unsuitable<br>extinguishing media | : None known.   |  |

### Section 5. Firefighting measures

|    | -   |   | -   |
|----|---|---|---|
| В. | Specific hazards arising<br>from the chemical         | : | In a fire or if heated, a pressure increase will occur and the container may burst.<br>This material is very toxic to aquatic life with long lasting effects. Fire water<br>contaminated with this material must be contained and prevented from being<br>discharged to any waterway, sewer or drain. |
|    | Hazardous thermal decomposition products              | : | Decomposition products may include the following materials:<br>carbon dioxide<br>carbon monoxide<br>nitrogen oxides<br>metal oxide/oxides   |
| C. | Special protective<br>equipment for fire-<br>fighters | : | Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.   |
|    | Special precautions for<br>fire-fighters              | : | Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.   |

### Section 6. Accidental release measures

| A. Personal precautions,<br>protective equipment<br>and emergency<br>procedures | : No action shall be taken involving any personal risk or without suitable training.<br>Evacuate surrounding areas. Keep unnecessary and unprotected personnel from<br>entering. Do not touch or walk through spilt material. Do not breathe vapour or mist.<br>Provide adequate ventilation. Wear appropriate respirator when ventilation is<br>inadequate. Put on appropriate personal protective equipment. |
|---|--|
|---|--|

B. Environmental precautions
 Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities. Collect spillage.

#### C. Methods and material for containment and cleaning up

| Small spill | : Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.   |
|-------------|---|
| Large spill | : Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal. |

### Section 7. Handling and storage

#### A. <u>Precautions for safe handling</u>

Protective measures
 Put on appropriate personal protective equipment (see Section 8). Persons with a history of skin sensitization problems should not be employed in any process in which this product is used. Avoid exposure - obtain special instructions before use. Avoid exposure during pregnancy. Do not handle until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not breathe vapour or mist. Do not ingest. Avoid release to the environment. If during normal use the material presents a respiratory hazard, use only with adequate ventilation or wear appropriate respirator. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.

### Section 7. Handling and storage

|    |  | _ | •   |
|----|--|---|---|
|    | Advice on general occupational hygiene                             | : | Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures. |
| В. | Conditions for safe<br>storage, including any<br>incompatibilities | : | Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Store locked up. Keep container   |

materials (see Section 10) and food and drink. Store locked up. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.

### Section 8. Exposure controls/personal protection

#### A. <u>Control parameters</u>

#### Occupational exposure limits

| Ingredient name                       | Exposure limits  |
|---------------------------------------|--|
| crystalline silica, respirable powder | Ministry of Labor (Republic of Korea, 8/2013).                       |
|                                       | TWA: 0.05 mg/m <sup>3</sup> 8 hours. Form:                           |
|                                       | Respirable fraction  |
| Mica-group minerals                   | Ministry of Labor (Republic of Korea,                                |
|                                       | 8/2013).   |
|                                       | TWA: 3 mg/m <sup>3</sup> 8 hours. Form: Respirable                   |
|                                       | fraction   |
| crystalline silica, respirable powder | Ministry of Labor (Republic of Korea,                                |
|                                       | 8/2013).   |
|                                       | TWA: 0.05 mg/m <sup>3</sup> 8 hours. Form:                           |
|                                       | Respirable fraction  |
| titanium dioxide                      | Ministry of Labor (Republic of Korea,                                |
|                                       | 8/2013).   |
|                                       | TWA: 10 mg/m <sup>3</sup> 8 hours. Form: total dust                  |
|                                       | with less than 1% of free SiO2                                       |
| xylene                                | Ministry of Labor (Republic of Korea,                                |
|                                       | 8/2013).   |
|                                       | STEL: 655 mg/m <sup>3</sup> 15 minutes.                              |
|                                       | STEL: 150 ppm 15 minutes.  |
|                                       | TWA: 435 mg/m <sup>3</sup> 8 hours.                                  |
| O Ol inside a dia the base in a       | TWA: 100 ppm 8 hours.  |
| 2,2'-iminodiethylamine                | Ministry of Labor (Republic of Korea,                                |
|                                       | 8/2013). Absorbed through skin.                                      |
|                                       | TWA: 4 mg/m <sup>3</sup> 8 hours.                                    |

|                                       | TWA: 435 mg/m 8 hours.   |
|                                       |  |

## B. Appropriate engineering controls

:

: If user operations generate dust, fumes, gas, vapour or mist, use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits.

**AkzoNobel** 

### Section 8. Exposure controls/personal protection

|    | Environmental<br>exposure controls | issions from ventilation or work process equipment should<br>y comply with the requirements of environmental protection<br>ses, fume scrubbers, filters or engineering modifications to<br>upment will be necessary to reduce emissions to acceptab   | n legislation. In some the process   |
|----|------------------------------------|---|--|
| C. | Personal protective equi           |   |  |
|    | Respiratory protection             | e a properly fitted, air-purifying or air-fed respirator complyindard if a risk assessment indicates this is necessary. Republicated on known or anticipated exposure levels, the hazard safe working limits of the selected respirator.  | spirator selection must  |
|    | Eye protection                     | ety eyewear complying with an approved standard should<br>essment indicates this is necessary to avoid exposure to l<br>ses or dusts. If contact is possible, the following protection<br>ess the assessment indicates a higher degree of protection<br>ggles and/or face shield. If inhalation hazards exist, a full-f<br>uired instead.   | quid splashes, mists,<br>should be worn,<br>n: chemical splash   |
|    | Hand protection                    | e chemical resistant gloves classified under Standard EN 3<br>ainst chemicals and micro-organisms. Recommended: V<br>ten prolonged or frequently repeated contact may occur, a<br>ss of 6 (breakthrough time greater than 480 minutes accor<br>ommended. When only brief contact is expected, a glove v<br>2 or higher (breakthrough time greater than 30 minutes accor<br>ommended. The user must check that the final choice of the<br>handling this product is the most appropriate and takes inter-<br>ticular conditions of use, as included in the user's risk asse<br>e selection of a specific glove for a particular application ar<br>rkplace should also take into account all relevant workplace<br>limited to: Other chemicals which may be handled, physic<br>neture protection, dexterity, thermal protection), potential be<br>terials, as well as the instructions/specifications provided b<br>rrier creams may help to protect the exposed areas of the so<br>oblied once exposure has occurred. | iton® or Nitrile gloves.<br>glove with a protection<br>ding to EN 374) is<br>with a protection class<br>cording to EN 374) is<br>ype of glove selected<br>o account the<br>essment. NOTICE:<br>ad duration of use in a<br>e factors such as, but<br>al requirements (cut/<br>ody reactions to glove<br>y the glove supplier. |

| Q. | Decomposition<br>temperature                       | : | Not available.   |
| R. | Viscosity  | : | Kinematic (room temperature): 4621 mm <sup>2</sup> /s (4621 cSt) |
| S. | Molecular weight                                   | : | Not applicable.  |

### Section 10. Stability and reactivity

| Α. | Chemical stability                    | : | The product is stable.   |
|----|---------------------------------------|---|--|
|    | Possibility of hazardous<br>reactions | : | Under normal conditions of storage and use, hazardous reactions will not occur.                      |
| В. | Conditions to avoid                   | : | No specific data.  |
| C. | Incompatible materials                | : | No specific data.  |
| D. | Hazardous<br>decomposition products   | : | Under normal conditions of storage and use, hazardous decomposition products should not be produced. |

### Section 11. Toxicological information

| Α. | Information on likely | : | Not available. |
|----|-----------------------|---|----------------|
|    | routes of exposure    |   |                |

#### Potential acute health effects

| Inhalation                | <ul> <li>May give off gas, vapour or dust that is very irritating or corrosive to the respiratory<br/>system. Exposure to decomposition products may cause a health hazard. Serious<br/>effects may be delayed following exposure.</li> </ul> |
|---------------------------|---|
| Ingestion                 | : Harmful if swallowed. May cause burns to mouth, throat and stomach.   |
| Skin contact              | : Causes severe burns. May cause an allergic skin reaction.   |
| Eye contact               | : Causes serious eye damage.  |
| <u>Over-exposure sign</u> | s/symptoms  |
| Inhalation                | : Adverse symptoms may include the following:<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations   |
| Ingestion                 | : Adverse symptoms may include the following:<br>stomach pains<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations  |

### Section 11. Toxicological information

| Skin contact | : Adverse symptoms may include the following:<br>pain or irritation<br>redness<br>blistering may occur<br>reduced foetal weight<br>increase in foetal deaths<br>skeletal malformations |
|--------------|--|
| Eye contact  | : Adverse symptoms may include the following:<br>pain<br>watering<br>redness   |
|              |  |

#### B. Health hazards

#### Acute toxicity

| Result                          | Species  | Dose  | Exposure  |

| 2,2'-iminodiethylamine                 | -5.58  | 4.466835921  | low       |
| bisphenol A                            | 3.4    | 43.651583224 | low       |
| ethylbenzene                           | 3.6    | 15           | low       |

#### D. <u>Mobility in soil</u> Soil/water partition coefficient (K<sub>oc</sub>)

: Not available.

E. Other adverse effects : No known significant effects or critical hazards.

### Section 13. Disposal considerations

| Α. | Disposal methods     | : The generation of waste should be avoided or minimised wherever possible.<br>Disposal of this product, solutions and any by-products should at all times comply<br>with the requirements of environmental protection and waste disposal legislation<br>and any regional local authority requirements.<br>Dispose of surplus and non-recyclable products via a licensed waste disposal<br>contractor. Waste should not be disposed of untreated to the sewer unless fully<br>compliant with the requirements of all authorities with jurisdiction. Waste packaging<br>should be recycled. Incineration or landfill should only be considered when recycling<br>is not feasible. |
|----|----------------------|--|
| В. | Disposal precautions | : This material and its container must be disposed of in a safe way. Care should be  |

B. Disposal precautions
 This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

:

IMPORTANT NOTE: the information contained in this data sheet (as may be amended from time to time) is not intended to be exhaustive and is presented in good faith and believed to be correct as of the date on which it is prepared. It is the user's responsibility to verify that this data sheet is current prior to using the product to which it relates.

Persons using the information must make their own determinations as to the suitability of the relevant product for their purposes prior to use. Where those purposes are other than as specifically recommended in this safety data sheet, then the user uses the product at their own risk.

### Section 16. Other information

MANUFACTURER'S DISCLAIMER: the conditions, methods and factors affecting the handling, storage, application, use and disposal of the product are not under the control and knowledge of the manufacturer. Therefore the manufacturer does not assume responsibility for any adverse events which may occur in the handling, storage, application, use, misuse or disposal of the product and, so far as permitted by applicable law, the manufacturer expressly disclaims liability for any and all loss, damages and/or expenses arising out of or in any way connected to the storage, handling, use or disposal of the product. Safe handling, storage, use and disposal are the responsibility of the users. Users must comply with all applicable health and safety laws.

Unless we have agreed to the contrary, all products are supplied by us subject to our standard terms and conditions of business, which include limitations of liability. Please make sure to refer to these and / or the relevant agreement which you have with AkzoNobel (or its affiliate, as the case may be). © AkzoNobel
